Assistant Professor, Department
of Medicine, University of Toronto
Medical Director, Canadian
Collaborative Research Network
Brampton, ON

CO-CHAIRS

Narendra Singh,
MD, FRCPC, FCCS, FACC, FAHA
Director, NSC Cardiology
Clinical Assistant Professor,
Medical College of Georgia at
Augusta University and Mercer
University
Atlanta, GA

This program will cover the key clinical trial findings and their implications from ESC 2023. This program is intended for cardiovascular specialists and primary care physicians from across Canada.

Discussion Topics:

- New treatments for hypertrophic cardiomyopathy
- CLEAR-Outcomes – new data with bempedoic acid in patients with statin intolerance
- Is there a role for semaglutide in patients with HFpEF?
- Dapagliflozin early in heart failure management
- Anticoagulation for high atrial rate episodes without AF
- Cutting edge advances in lipids, diabetes, kidney disease, and heart failure

Learning Objectives:

Following participation in this program, participants will be able to:

- Identify the clinical implications of the new data presented at ESC 2023
- Examine where the data presented may impact clinical practice guidelines
- Apply the latest evidence-based strategies in clinical practice

This program was developed by CCRN and received an unrestricted educational grant from:

HLS
